Julio Corbalán Moreno

Software Engineer · Java Backend & Infrastructure (Linux, Kubernetes)

Barcelona, Spain | jcorbalan@mailbox.org | 644 21 15 33 | jcorbalan.com | jcorbalanm | jcorbalanm

Profile

Computer engineer with a year as a backend developer (Java, Spring Boot, Oracle) and two and a half years running production infrastructure at **Aena**: 100-150 physical and virtual servers supporting 300+ users. In my **Proxmox** homelab I built a highly available **Kubernetes** cluster on **Talos Linux**, and my final-year project deployed **Kubeflow** on that same platform. Studying for the **CKA**. Looking for a **DevOps / Platform / Cloud** role where both sides count: I understand how applications are built and how they are run.

Professional Experience

Minsait, Software Developer — Remote — Oct 2025 – present

- Development on a housing aid management project for the **Valencian Regional Government (Generalitat Valenciana)**, within a team of 10-15 people.
- Development of assigned tasks on **Oracle** (**PL/SQL**), **Spring Boot** and **ZK Framework**.
- Version control with **Git** and **Bitbucket**, following agile methodology with **Jira**.

Aena, Level 1 Technical Support, Systems & Infrastructure — Alicante, Spain — Mar 2023 – Sept 2025

- Administered **100-150 physical and virtual servers** (**Windows Server**, **SUSE Linux**) across **Hyper-V** and **VMware**.
- 24/7 support in 12-hour day and night shifts for **300+ users** incident handling and corporate application support through **BMC Helix ITSM**.
- Proposed and shipped a **Docker**-based deployment of an open-source application to get around dependency limits on the corporate SUSE servers, introducing containers to the team.
- System monitoring and alarm response from monitoring dashboards.
- Monthly patching and updates of **Windows** servers, and backup job monitoring.
- Managed SQL databases and Exchange mail servers.
- Improved internal technical documentation of processes and systems.

Projects

Homelab: Proxmox, Kubernetes (Talos Linux) and Docker — 2023 – present

- 2-node **Proxmox VE** cluster (HP ProDesk/EliteDesk G4, i5-8500/8500T, 32 GB RAM and 1 TB NVMe per node).
- Built a highly available **Kubernetes** cluster on **Talos Linux**, an immutable, API-managed OS: 3 control-plane, 2 worker and 2 storage nodes.
- Today, 20+ self-hosted services with **Docker Compose** on **Debian**, behind **Traefik** remote access over **Tailscale** storage on **TrueNAS SCALE**.

Final-year project: Kubeflow on Kubernetes (Talos + Proxmox) — Jan 2026

- Deployed **Kubeflow** on a Talos Linux Kubernetes cluster virtualised on Proxmox, with persistent storage over **NFS** from TrueNAS and single sign-on with **Dex**.

Reproducible workstation: NixOS + GitHub Actions

- Whole desktop configuration declared as code in a **NixOS** flake, versioned on GitHub and checked by a **GitHub Actions** CI pipeline.

notion-appimage and trmnl-github-workflows

- Notion packaged as an **AppImage** with automated update builds, and a **TRMNL** plugin that summarises the last 100 GitHub workflow runs.

Open Source

levante-hub/levante Mar 2026

- Added **AppImage** support for Linux by modifying the **GitHub Actions** pipeline and Electron Forge configuration. 40★ on GitHub.

usetrmnl/trmnl-i18n Nov 2025

- Spanish translation of the internationalisation system for the TRMNL device. 23★ on GitHub.

Fivefold/linkding-injector Oct 2025

- UI improvement contribution to an open-source browser extension. 353★ on GitHub.

Education

BSc **University of Alicante**, Computer Engineering — Alicante, Spain

Sept 2020 – Jan 2026

- Final-year project: Kubeflow on Talos Linux + Proxmox (see Projects).
- Notable project, implementation of a distributed messaging system with **Apache Kafka** and Python (4 months).

Certifications

Certified Kubernetes Administrator (CKA) In progress, exam planned for December 2026

Linux Foundation: Introduction to Linux (LFS101) Aug 2025

- Course covering Linux fundamentals and command-line usage.

Udemy: Grafana Nov 2025

- Metrics monitoring and visualisation with Grafana.

Udemy: PL/SQL – Oracle Database Jan 2026

- Advanced queries, stored procedures and triggers in Oracle.

Technical Skills

Containers & orchestration: Kubernetes, Talos Linux, Docker, Docker Compose, Traefik

Virtualisation & storage: Proxmox VE, VMware, Hyper-V, TrueNAS SCALE (NFS)

Operating systems: Linux (SUSE, Debian/Ubuntu, NixOS), Windows Server

Automation & CI/CD: GitHub Actions, NixOS flakes, Bash, Git

Networking & identity: Tailscale, Dex (OIDC SSO), reverse proxying

Backend: Java, Spring Boot, Spring Data JPA, Hibernate, Spring Security, Maven, JUnit

Databases: Oracle Database, PL/SQL, MySQL, SQL Server

Tools: Bitbucket, Jira, Postman, Grafana, BMC Helix ITSM

Other: Python (basic), ZK Framework, Angular (initial training)

Languages

Spanish: Native

English: Advanced

Catalan: Intermediate
